DETAILED ACTION

Response to Amendment

1. The reply filed on February 28, 2006 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s): In the requirement for restriction/election mailed on January 30, 2006, applicant was required to elect one specie from several patentably distinct species identified in the application.

For instance, applicants were required to elect one claim from claims 2-8 that are directed to different species of the generic feature of incurrance of delinquent debt.

Similarly applicants were required to elect one claim from claims 9-27 that are directed to different species of the generic feature of collection methods.

Applicants were required to elect one claim from claims 28-35 that are directed to different species of the generic feature of historical data.

Applicants were required to elect one claim from claims 39-41 that are directed to different species of the generic feature of mathematical representation.

Applicants were required to elect one claim from claims 43-51 that are directed to different species of the generic feature of plurality of account segments.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is

allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment.

EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).
